SUMMARY

I'm a front-end (React) developer with experience in creating SPA using React, Redux, RTK Query, MUI etc.

I develop with Next.js for SSR applications.

I'm using Typescript for best control of the code in work.

I have an experience of working with a team using a distributed version control system Git.

I have interest to learn React Native for mobile development.

Open for your suggestions.

EXPERIENCE

CARDS-LEARNING-APP

Educational app made with React / RTK Query / MUI

- Team work with Jira
- Created authorization flow with reset password opportunity
- Daily maintenance of code, debugging issues and solving problems
- HTTP requests with RTK Query GET / POST / PUT / DELETE

SOCIAL-NETWORK

Made with React / Redux / Typescript

- HTTP requests implemented with axios
- Authorization flow with captcha implementation
- App routing created with react-router-dom v6

TODOLIST

PWA for tasks tracking

- Server requests by Rest API architectural style
- Made with React / Redux / Typescript / axios
- Authorization flow implementation

For all my projects

I'm checking the correctness of the code with Unit Tests, applying Storybook for demonstration of individual modules of the application. Using TypeScript for the best code control during development.
