SUMMARY

I'm a front-end developer specializing in React. I've built single-page applications using React, Redux, RTK Query, and Material-UI. I also have experience with Next.js for server-side rendering.
I use TypeScript to ensure clean and reliable code. I'm comfortable working in teams with Git for version control.

I'm interested in learning React Native for mobile development and open to new opportunities and suggestions.

EXPERIENCE

Front-end applications
- Developed responsive single-page applications using React, Redux, RTK Query, and Material-UI to deliver engaging user experiences.
- Implemented server-side rendering (SSR) with Next.js to optimize performance and SEO.
- Utilized TypeScript to enhance code quality, ensuring scalability and maintainability across projects.
- Collaborated effectively with distributed teams, utilizing Git for version control and seamless code collaboration.
- Actively contributed to architectural discussions and code reviews, ensuring adherence to best practices and standards.
- Implemented authorization flows, including user authentication and password recovery, to ensure secure access to application features.

Telegram bots
- Created and managed a Telegram bot that uses OpenAI GPT for chatting.
- Added features for translating text, making images, and finding info.
- Designed easy-to-use interfaces for the bot in Telegram.
- Used MongoDB to store and get data, making sure it worked well.
- Worked with teams to make sure the bot did what users wanted.
- Tested the bot to fix any problems and make it stable.
- Set up and managed a cloud server to host the Telegram bot.
- Ensured the server was reliable and could handle the bot's tasks efficiently.
